HOW WELL DO YOU KNOW YOUR PDE?

OPTIMIZE YOUR PDE WITH BLUEPEAK'S PDE3 SERVICE

MONITOR. MANAGE, MAXIMIZE.

You wouldn't leave money on the table, right?!

But if you aren't monitoring and managing your Prescription Drug Event (PDE) data, you could be losing up to 33 percent of total drug spend in reimbursable payments on each PDE record that is not accepted by CMS. In addition, a higher volume of accepted PDE records will boost your medication adherence measures, which are heavily weighed at 3 for Star Ratings.

Let BluePeak Advisors Monitor, Manage and Maximize your PDE data with our **PDE3™** service. Our PDE experts will work with your team to validate the accuracy of your PDE records and CMS payments, while reducing your PDE rejection rate.

Need another reason to enlist **PDE3™** to better monitor and manage your PDE data? Each year, CMS requires plans to certify the accuracy of their PDE data, prior to financial reconciliation (CFR 423.505(k)(3) and (5)). With BluePeak's **PDE3™** you can attest with added confidence that your PDE data is accurate.

BluePeak will provide the expertise and reporting necessary to demonstrate the accuracy of PDE records, as well as reconcile any CMS financial reports, including annual PDE financial reconciliation.

MONITOR

- Audit PDE records for payment accuracy
- Maintain audit logs and assist with corrections

MANAGE

- Reconcile monthly CMS financial reports
- Validate quarterly Coverage Gap Discount payments
- Perform plan-specific PDE financial outputs

MAXIMIZE

- Collaborate to maximize PDE acceptance rate to optimize CMS payments
- Mitigate future PDE rejections
- Generate monthly PDE reports
