DROWNING IN A SEA OF HPMS MEMOS? CATCH THE BLUEPEAK GUIDANCE MONITOR

CMS releases over 500 HPMS memos each year. Keeping up with the waves of HPMS memos is challenging enough. Add in proposed and final rules, the annual Call Letter, and those tidbits of important guidance CMS posts on their website and other places with no notice, and you may feel the current of CMS guidance pulling you under.

The BluePeak Guidance Monitor can be a life saver when it comes to keeping you up to date and informed about CMS guidance. As a BluePeak Guidance Monitor Subscriber, you receive:

- A weekly log of CMS guidance, tailored to your organization:
 - No more wading through guidance that doesn't apply to your operations
 - Not just limited to HPMS memos; also includes guidance from CMS' website, Federal Register, Office of Management and Budget, and more
 - Includes guidance summaries by operational areas and level of urgency
- Your very own BluePeak Senior Consultant to highlight the guidance that needs your attention and answer any questions you may have.

CMS remains very interested in what plans do with all that guidance. Distribution and implementation of guidance has been tested in all areas of CMS' program audits, whether as a Compliance Program Effectiveness (CPE) tracer or the expectation that the most recent model notifications are utilized or the correct number of outreach attempts have been performed.

In addition to providing valuable information and support, the BluePeak Guidance Monitor saves staff time and helps ensure your organization is audit ready.

Catch the BluePeak Guidance Monitor. We got this!
