

Partnering with Plans for Bid Operational and Quality Reviews

BluePeak can work with you to assess your annual Medicare Advantage Bid by performing a bid benefit review, and/or PBP quality review.

Bid Benefit Review

Between February and June, decisions are made on Medicare Advantage plan bids that impact your operations and membership materials for the next plan year.

It is important that changes being considered by plans are aligned with member expectations, operational objectives, and financial goals, while at the same time mindful of the competition.

Plans often find themselves with operational challenges when the bid has not been reviewed against current processes and system set up.

BluePeak reviews inputs to the PBPs, line-by-line, and discusses with operations staff and plan actuarial contractors, to ensure understanding of the intent and that the goals are being met.

In addition, key operational and benefit changes are identified, reducing the risk of errors in member materials and flags from CMS desk review.

We can help establish a best practice for review of benefits, singularly, and in total, across various plans, so plan goals can be achieved.

Bid-PBP Quality Reviews

It's important that the Plan Benefit Package (PBP) you submit accurately reflect the intended benefit design described and are supported by the bid pricing tool.

BluePeak has experienced reviewers who have a strong understanding of the bid data entry process and can review the PBP for accuracy, implementation, and compliance—whether you have 1 product offering or hundreds!

- ▶ BluePeak reviews for alignment of PBP data that reside in several areas, optional (either mandatory or supplemental) benefits vs. core Medicare covered benefits, described throughout the PBP data.
- ▶ BluePeak establishes communication with key stakeholders to ensure the intended benefit design is submitted.
- ▶ BluePeak can establish processes for best practices and relieve some of the stress associated with bid submission and operational implementation.
