

New Year, New Benefits. **ARE YOU READY?**

BluePeak can perform Year-end Benefit Testing for your Part C and Part D plans to ensure compliance.

The member experience is the most critical reason for ensuring the benefits are set up accurately. However, claims adjudication errors can result in audit findings and issues of non-compliance. CMS continues to focus on claims accuracy for both Part C and Part D through Program Audits and Financial Audits. In addition, on the Part D side other audits such as Timeliness Monitoring and PDE Self Audits also focus on claims accuracy.

Part C Testing

✓ BENEFIT TESTING

BluePeak Advisors can assist with testing to ensure that all benefits have been set up correctly within a Health Plan's system. The benefit testing program develops customized test cases based on the Health Plan's specific benefits and cost shares. BluePeak Advisors also provides an executive level summary that outlines details on testing that failed.

✓ BENEFIT ACCURACY

BluePeak Advisors reviews claims for the application of the Enrollee's contractual benefits and cost sharing as outlined in the Evidence of Coverage (EOC) and as required by CMS Medicare Advantage regulations.

Part D Testing

✓ BENEFIT ACCURACY

BluePeak Advisors reviews paid claims and validates claims are paying according to your submitted CMS approved bid benefits. BluePeak's testing includes all four Medicare Part D benefit phases, one month or extended day supplies, CMS subsidies and pharma discounts, and any day supply limitations.

✓ FORMULARY ADMINISTRATION

BluePeak Advisors reviews claims to ensure claims are processing according to the CMS approved formulary. BluePeak will validate claims are rejecting based on the product's formulary status and any formulary restrictions including quantity limits and prior authorizations. Additionally, BluePeak will review paid claims to validate the product's formulary status, benefit tier, and ensure the claim is within any formulary restrictions.

✓ TRANSITION OF CARE (TOC)

BluePeak Advisors reviews claims are processing according to TOC rules and regulations. BluePeak will include a review of the formulary and the TOC policy to validate claims are paying appropriately for new and existing beneficiaries.
