

# BluePeak's claims testing services can help PBMs identify issues *before* their clients or CMS does!

With the implementation of the IRA, CMS is now targeting:

## → IRA Changes

- Maximum monthly copays on insulin products
- No enrollee costs applied for adult ACIP vaccines
- Application of the deductible on insulin and ACIP vaccines
- No enrollee cost sharing beyond the TrOOP/Member Out-of-pocket (MOOP) limit

## → Part B

- Part B copays are paying at the appropriate cost sharing
- Part B products are applying the appropriate pricing

## While Still Targeting Previous Common Audit Findings

- Unbreakable Packages
- Medicare Part B vs. Part D Determinations
- New and Returning Members in Transition
- Protected Class Drugs
- Accurate Quantity Limits and Step Therapy

# Medicare Part D Claims Under More Scrutiny Than Ever!

## Year-End Formulary and Benefit Testing

Claims adjudication errors can result in audit findings, issues of non-compliance, as well as potentially paying fees to health plans for various contractual guarantees. BluePeak can provide an additional level of testing for PBM's to be confident that all CMS requirements are coded correctly for your Medicare customers.

BluePeak has the capability to test multiple formularies and multiple benefits to capture nuances that can vary throughout Medicare plans. Our team of consultants consists of senior level managed care professionals, experienced clinicians and former Centers for Medicare and Medicaid (CMS) regulators who have worked at health plans and pharmacy benefit managers (PBMs) for most of their careers.

## Claims Monitoring

In addition to year-end benefit testing, BluePeak can provide ongoing claims monitoring. BluePeak Advisors ensures claims process according to the CMS approved formulary.

BluePeak will validate both paid and rejected claims based on the product's formulary status, including tier placement and any formulary restrictions including quantity limits and prior authorizations.

BluePeak's testing includes all four Medicare Part D benefit phases as well as CMS required adjudication logic including

- IRA Changes
- Part B

## BluePeak Assists with Claims Analysis and Much More.

Helping plans analyze claims data is just one of the many ways BluePeak Advisors assists health care stakeholders.

We understand the challenges facing plans, pharmacy benefit managers, pharmaceutical companies and other allied health businesses with resource limitations, systems issues, vendor oversight and the onslaught of daily CMS guidance and regulations.

Our seasoned Medicare subject matter experts and business managers have worked for and with all our lines of business.

**Plans should perform daily rejected and paid claim reviews to ensure member access to medication.**

**BluePeak can help.**
